Guideline

for

STAT 32950-24620 final exam

10 am Tuesday, May 23

- The final exam will be in-class, closed-book, similar to the midterm.

- Like the midterm, one page of formula sheet prepared by yourself is allowed.
  The sheet can be two-sided, up to standard letter size of $8.5''$ by $11''$.

- Your formula sheet should not include examples, preferably handwritten.

- The exam time is two hours.

- The exam covers topics in the lectures, notes, and assignments 1-7.
  However the topics and materials after the midterm will be emphasized.

- There will be no R programming in the in-class exam.

- You may be asked to use partial R output to answer questions and conduct statistical analysis.

- The take-home final for 32950

  Upon the completing of your in-class final, 32950 students will receive the 24-hour take-home final.
  The take-home final is similar to a short home assignment, with R programming.
  The take-home final must be completed independently, without communications with anyone.
